📍 Insein street, Kyeemyin Daing Townships, Yangon

SKILLS

HTML, CSS, JavaScript, TypeScript, React, Redux, Zod, Next.js, Tailwind, Bootstrap, jQuery, Node.js, ExpressJS, MongoDB, MySQL, Firebase, Prisma, Linux, Ubuntu, Digital Ocean, Git and Github.

OBJECTIVE

Hello, I'm a web developer who writes efficient, robust, scalable and maintainable codes for front-end and back-end development. After successfully completing my Diploma in Nautical Science from Myanmar Mercantile Marine College, I decided to pursue my passion for programming. I studied full-stack web development from online courses on platforms like Udemy and Coursera. My favorite part of programming is the problem-solving aspect. I love the feeling of finally figuring out a solution to a problem. My core stack includes React, Next.js, Node.js, MySQL, and MongoDB, Firebase and other utility libraries. Although I learned PHP and Laravel, I haven't dedicated as much time to them. I'm currently looking for a full-time position as a software developer. When I'm not coding, I enjoy playing the guitar, listening to music, walking, reading, and playing football. I also like learning about philosophy, psychology, and mathematics.

EXPERIENCE

Designed and built an E-commerce web app using Next.js, Node.js, and MongoDB. I also designed and built other projects by myself. You can check out my projects at "<https://trss.vercel.app>."

EDUCATION

Diploma in Web Development

Y-max University
